Application/Control Number: 09/522,877

Art Unit: 1731

- 1. Claims 20-24 remain withdrawn from further consideration.
- 2. Claims 6-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original specification does not support the claims as amended which recite "said cellulose derivative consisting of at least two layers". Although, the specification support the application of the cellulose derivative in at least two layers, it is not clear from the specification that the material once applied remains present in the form of distinct layers.
- 3. The art rejection has been withdrawn in view of the amendment to the claims referenced above. Note, however, that the rejection may be reapplied if the claims are amended to their previous form.
- 4. Applicant's arguments filed 6/5/03 have been fully considered but they are not persuasive.

With respect to the withdrawn art rejection applicant argues:

Applicant respectfully submits that the Adams et al. reference teaches away from a coated paper having a high Coresta value as in the present invention. Specifically, Adams et al. in column 7, lines 24-25 teaches that after the paper is coated the porosity is below 200 Coresta and is often below 30 Coresta and usually at least 5 Coresta. Applicant submits that the Adams et al. reference teaches the reduction of air permeability of the paper which is an opposite teaching of the present invention which is to increase the Coresta value of the paper after being coated.

Application/Control Number: 09/522,877

Art Unit: 1731

This argument is not persuasive. The permeability range disclosed by Adams includes claimed values.

Applicant further submits that Adams et al. does not teach or suggest that the cellulose derivative consists of at least two layer of coating on the paper as defined in Claim 6 and Claim 13, as amended, in the present application.

This argument is not persuasive. The claim language to which this refers has been rejected as being directed to new matter.

Applicant respectfully submits that one skilled in the art would not be motivated to combine the cellulose derivative coated paper as disclosed by Adams et al. with Ishino et al. teaching of a watered soluble paper since both references relate to different areas of the art and would not be combined.

This argument is not persuasive. The test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. *In re Keller* 208 USPQ 871, 881; *In re Sernaker* 217 USPQ 1. It is maintained that the teachings in the cited references would have suggested to one skilled in the art at the time of the invention that coating both sides of the paper to adjust the permeability.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 09/522,877

Art Unit: 1731

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher A. Fiorilla whose telephone number is 703-308-0674. The examiner can normally be reached on M-F, 6:30am-3:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven P. Griffin can be reached on 703-308-1164. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7718 for regular communications and 703-305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0651.
